

Synchrony™ System for Polycarbonate Lenses

Our innovative system for processing polycarbonate lenses offers advanced technology that is especially formulated to work together delivering unsurpassed results.

Velocity™ – One-Step Fining Pad for Polycarbonate

- Reduced fining times with consistent stock removal and excellent surface quality. It works on all generator surfaces.

Lumina™ – Premium Polishing Pad

2009 OLA Award of Excellence Winner!

- The unique pad construction employs a mixture of fiber lengths and densities that place polish where you need it – on the lens surface and reduces slurry carry out.

HD-360™ – Premium Lens Polish

2008 OLA Award of Excellence Winner!

- Improved clarity with reduced polycarbonate haze, providing a superior surface for eventual coating.

Try them together for best results!
